

Welcome to Good Gut, Bad Gut Syllabus

By the completion of the GGBG course, the student will come away with not only an overview, which is necessary to use homeopathy effectively, but specific strategies for each condition covered. The protocols taught in this course are unlike any other methods used in the U.S. and Europe because they are distilled to simplify an otherwise complex method. Joette uses the Banerji Protocols to give the astute student near immediate skill, bypassing years of homeopathic study.

Webinar 1:

- Our problems are not as unique as we think
- What causes a 'bad gut'- problems with antibiotics, vaccines, drugs, suppression, bad diet and environmental toxins
- General rules for using homeopathic remedies
- Observation according to homeopathic theory: asking questions and taking note of symptoms that the patient might not notice or realize
- Pacing of chronics vs. acutes and measure in degrees of changes
- The connection between the health of the gut and the rest of the body
- Diet alone is often not enough
- Treating acutes to prevent chronics, dealing with chronics once they've set in
- Obstacles to cure
- Questions
