

Attention Deficit Disorder and Homeopathy

This week is an exciting one for me. I'll be launching my newest (and very exciting) course titled, [*The Ultimate Cool Kids' Guide to Homeopathy: Become a Revolutionary Independent Thinker with Practical Homeopathy.*](#)

My team and I have been putting in long hours to get this course just right.

The goal? To teach your kids the fundamentals and practical methods of homeopathy, while also keeping them engaged throughout the learning process. I promise this to be an adventure that will change your child's future.

One of the biggest challenges in education is keeping kids

interested enough in the subject matter to keep moving forward.

Teachers, school counselors, and even pediatricians know nothing of what I'm about to share with you.

Poor them. And pity the kids they have reign over.

But they're not you.

Which brings me to today's subject: **Attention Deficit Disorder**, aka ADD. For those who are new to homeopathy, it's difficult to imagine it could fix such a condition, especially without mood-altering pharmaceuticals. But homeopathy can do just that.

I've seen the medicine I'm about to share with you act in a most profound way. Even change a kid's life. In fact, positively change the lives of entire families.

And no more superfluous drugs.

No more frustration.

Super simple, inexpensive (less than \$15 a bottle), and as always, side effect free.

Most people think of ADD as something homeopathy can't fix. But it not only *can*, it often *does*.

As a homeopath who uses the method I've coined as Practical Homeopathy®, where I employ plenty of Banerji Protocols, I will tell you there are a couple of different protocols when it comes to the treatment of ADD. I'll start with the one the Drs. Banerji taught me during my eight years studying side by side them in India:

ADD, or Attention Deficit Disorder is often best met with [Hyoscyamus 6C](#) twice daily for a period of months.

It is not the only medicine we can choose for this

condition, but as it was given to me as a privileged observer in their world-famous clinic, The Prasanta Banerji Homeopathic Research Foundation in Kolkata, I learned it is one of the best for treating Attention Deficit Disorder. And in my practice, I've witnessed plenty of kids benefited by this method.

So, whether your child is homeschooled, privately schooled or publicly schooled, if it's clear that he simply cannot remain focused, is disengaged, and is not able to move forward, [Hyoscyamus 6C](#) is one of homeopathy's little secrets every family should know about.

Now, remember, as always this is medicine and ought not to be used without certainty that it is indeed needed and that it ought to be halted if it does no good. It should also not be used longer than 6 weeks if there is uncertainty. At this juncture, it's time to assess. If the medicine has shown some improvement in the child's behavior but more is needed, it's an indication that the medicine was well chosen and more time using it is in order.

One more thought you might want to consider: Diet can play an important role in behavior. More on that in future postings.

Now if you think this information is important enough for *you* to know, perhaps you'll want your *child* to have his/her hand on the pulse of how to use homeopathy and a life of self-reliance. Especially for those conditions you thought were not possible to treat without conventional drugs.

In my new course, I plan to teach your kids the foundations of homeopathy, along with how to treat their pets and livestock. Oh, and of course their future family.

Please consider [joining me](#) with your family and together we can change the world with common sense, traditional values and safer, more efficacious medicines!!

Warmly,

Joette

P.S. I designed an Infographic I've called *Buster's Tips – Homeopathy for Pets*. [Click here](#) if you own pets. You're going to want to have your own copy in your homeopathic library.

Remedy Cards

Want the important remedy picture for this blog as a pdf?

Build your homeopathic library as searchable files on your computer.

Print them out as convenient cards and keep them together in a book for those times when you don't have your computer handy.
