Michael is a 16 yr old athletic youth, who loves all sports especially football and basketball.
He unfortunately often has allergy attacks when he's outside.

His parents are first generation legal immigrants from Haiti. They do not always have the means to get medical care.

He happened to be visiting a friend, Brian, from school, and while they were out playing basketball he suffered an allergy attack. It was extreme, worse than he's had.
He kept sneezing and his eyes were itchy, then he was having trouble breathing.

Brian knew from his mother teaching him practical homeopathy what remedies he needed. He got the remedies and gave it to his friend. He gave a second dose 5 minutes later. Michael was fine in 15 minutes.

Michael then spoke to Brian's mother and left with a plan on how to treat his allergies.

He now doesn't suffer from allergies and loves playing on his high school football team.
