Hannah Weber – Indianapolis, Indiana

This isn’t a question, but I just had to share how much I enjoyed the first class. I’ve taken a few other of Joette’s courses and am a complete convert to homeopathy. While watching the first class of Rethinking Detox, a cat wandered across my desk and I put her in my lap so she didn’t accidentally disconnect me from the webinar. She sat there purring while I petted her for much of the rest of the class. I have been allergic to cats most all my life. I never itched, never sneezed, no watery eyes or anything. I took the Allergic! course when it was live and used some of the protocols on myself and my allergic daughter. (We don’t regularly take them any longer.) I never would have imagined that there would be a cat in my house, or that my daughter and I could overcome our allergies as much as we have before I learned about homeopathy. THAT is what real medicine can do! I admit I catch myself sharing with people all the time about all that homeopathy has done for my family.

Thanks for all you do!
