Judy Grisanti, Hamburg, New York

I have rheumatoid arthritis…well…maybe I should say I had rheumatoid arthritis. It has not only blown my mind, but my rheumatologist's mind too. He's still scratching his head. When I first sought Joette's help, my joints were like those of a 90 year old. My hair was falling out, I had abnormal stools, a carbuncle on my forearm, repetitive sinus infections and was waking nightly at 2-3 AM with night sweats. I loved golf, but that was no longer an option. Joette has taught me how to use homeopathy and a gluten free diet that has given me my life back. My rheumatologist didn't believe me until her saw my tests. My SED rate in June 2009 before homeopathy and dietary changes was 70. I started working with Joette January 2010 and in Oct 2010 it was 20. Then I went off all meds for arthritis and a myriad of other issues. Now July 2011 the SED rate is 6! I also had little to no allergies this past spring. That event alone is a remarkable one. Thank you for giving me my life back. 'Gotta go…I have a tee off in an hour!
