I have had great success with the protocols. My husband was diagnosed with Osteoarthritis in his little finger.

The doctors didn't give him any hope that it would get better, in fact he was told it will get worse as time moved on. He is a Musician and relies on his hands as a pianist and drummer. They offered him Steroid injections and if that didn't work they could operate to straighten it but it wouldn't cure it!! It was swelling and getting worse and he couldn't play the piano without aggravating it. His other hand was starting to pain him too but not as bad as his right hand.

He agreed to take the protocols, because he was getting desperate! I did offer it to him earlier but he'd refused at the time until he realized the doctor had no other help on offer. Symphytum 200c & Rhus Tox 30c 2x Daily within a couple of weeks the pain stopped spreading to his wrists and up his arm and after a month the swelling went down significantly that he could move his finger. After 3 months it had almost gone.

He is now pain free and no swelling. Now and then when he feels a slight pang I give him one dose and it's gone!! WOW!!

He also had the protocol for dry eyes which was getting worse. That too has gone!

Thank you Joette, for this beautiful, magnificent medicine. My husband is now a big fan of Homeopathy and tells anyone who will listen that it really works!
