

Mari Davis – Punta del Este, Uruguay

I just want to thank you, from the bottom of my heart, for giving me my life back. I had been on a downward decline in health for many years. My latest and worst affliction, food allergies, was the most difficult for me to accept since I'm a Julia Child loving amateur chef.

I got to the point where I would still make the dishes for family and friends, but had to be ever mindful not to taste anything containing gluten, casein or rice. In a word, I was miserable. I thought homeopathy was my last hope. I am so thankful I found you in the Weston A. Price Foundation Wise Traditions Journal.

I got in my consultation with you and received your recommended remedies only days before we moved to South America. With the stress of the move, I was not able to start taking the remedies until a few days after we arrived.

It was hard for me to watch my husband eat the new and tasty looking treats available here in Uruguay. I would make him take a bite and then smell and closely examine his latest gluten and casein containing morsel!

One day he told me to try a bite. I finally gave in. I was prepared to suffer the gluten consequences even if I was not better yet. It was delicious and I was thrilled to find I didn't suffer any of my usual gluten induced symptoms! I have been enjoying dairy and grains once more.

It has made our move to South America complete. THANK YOU, Joette!
