Sarah, Buffalo, NY

From birth, my baby had a raspy, phlegmy sound to her breathing along with a persistent low-level allergy. She also seemed to be falling prey to every respiratory illness that came through our home regardless of breastfeeding and good nutrition. Since we administered Psorinum, she hasn’t had another runny nose or respiratory issue. She is quickly approaching her first birthday, and her immune system has improved excellently! Joette, thank you so much!
