Homeopathy is…

Homeopathy is the real McCoy. It's the medicine we all hoped we were getting all along. In other words, homeopathic remedies are not cover ups of symptoms. They actually go to the heart of the problem and often resolve it. And as if this isn't enough, there are NO side effects. In fact the FDA has approved all the homeopathic remedies on the market since the 1940's at the advent of the FDA and not one – not even one – has ever been removed from the market because of detrimental effects to the public.

That is a track record of astounding proportions when one considers that there are over 3,000 homeopathic remedies available. Effective and safe. Can we ask for more?
