Susan T. from Alexandria, VA

Joette,

I have been a member of Weston Price for a couple of years and have read your articles, but never thought to google you until a couple of weeks ago! WOW! What a life changer for me!

I graduated from nursing school in 1987. Besides the years I took off to raise our 5 children (home birthing a couple and homeschooling etc) I have been entrenched in the western medicine mindset. In 2014, I had thyroid issues which caused me to explore dietary changes, from which I found Weston Price. Since then, God has led me away from the hospital setting (which I LOVED, because I love helping people experience better health). I now have a Health Consultant business, ok, really it's a ministry! where I help people navigate health through diet, rest, exercise, stress reduction and up til this point in supplements (which I HATE!). That is, until hearing all your wonderful podcasts and reading your blogs! I am currently taking your Gateway to Homeopathy course and just finished the Good Gut Bad Gut course! I feel as though I am drinking from the 'Fountain of Living Water'! In your podcast #52, Julie talked about "can't get enough!" That's me too! And it's all because of you!

Thank you for all you do!
Blessings and peace to you,

Susan T. from Alexandria, VA
