

Podcast 23 – Moms with Moxie Snap! Broken Bone.

In this podcast, we cover:

02:00 Kate's Favorite Remedies

08:08 How homeopathy cured her daughter from her illnesses

14:28 Sharing some amazing homeopathic experiences

23:23 Kate's accident and how *Arnica* and *Hypericum* helped a lot

You are listening to a podcast from joettecalabrese.com where nationally certified American homeopath, public speaker, and author, Joette Calabrese, shares her passion for helping families stay healthy through homeopathy and nutrient-dense nutrition.

Paola: It's another podcast at joettecalabrese.com. Today we've got a new episode for the Moms with Moxie miniseries.

Joette: All the way from my desk in New York, I get to see how homeopathy is transforming lives all over the globe. Some of my students have really caught my eye. Some of you have done all you can to learn how to cure those around you using homeopathic medicines. Your successes inspire me and they're glorious and powerful. I can't keep your successes a secret any longer. So with help from my roving reporter, Paola, we bring you this mini podcast series that I call "Moms with Moxie." It's actually grandmoms, too but it's moms with Moxie. See how regular mothers and others, average people who want to cure those around them have gone from freaking to fabulous with homeopathy.

Paola: Alright. I'm here with Kate Bechard from Wisconsin. I'm very happy to have her. Kate has a lot of knowledge about homeopathy and some pretty extreme experiences with it which probably weren't fun at the time but they're fun to talk about now that everything turned out well. She is a mother of two children. One's a teenager and one's entering their teenage years. She loves horses. They do a lot of activities with their horses. They love music. Kate says that she is passionate about healing and learning. Welcome, Kate.

Kate: Thank you. I'm glad to be here.

Paola: Yes. Joette and I both think you're definitely a mom with moxie. Yes, it's real good and we love moms with moxie because you guys are willing to do what it takes to learn and take on the challenges. Kate, we've been talking a lot about homeopathy leading up to this interview. Share with us. What are your favorite remedies and maybe tell us why.

Kate: With homeopathy, I get super excited. I think it's super hard to have just a few favorite remedies. Don't you?

Paola: Yes.

Kate's Favorite Remedies

Kate: This is a challenge. But I will tell you just a couple. Of course, *Arnica*. Who could live without *Arnica*, right? You have kids. You have animals. You need *Arnica*.

Paola: Right.

Kate: So definitely, I have to have that with me at all times.

Paola: A lot of people have *Arnica* and they don't even know they're using homeopathy. That's how popular *Arnica* can be. Yes.

Kate: It is. That's why I hate to say it's a favorite remedy but it's so important for accidents. We'll get into that a little bit later.

Paola: Yes.

Kate: So *Arnica* is one of my favorites. *Arsenicum* is another one of my favorites. My kids actually have not had the stomach flu in five years. I attribute it to God and *Arsenicum* because pretty much every time they tell me they have a tummy ache, I tell them to take some *Arsenicum*.

Paola: Right, great for tummy aches and kind of

gastrointestinal issues.

Kate: Another favorite remedy that I have is *Ledum*. That is a remedy that I use quite often as well for bee stings, bug bites, tick infections, things like that. So, it's definitely one of my go-to remedies.

Paola: That's awesome. I love it. I'm always surprised at how much *Ledum* helps, sometimes even more than *Apis* when it comes to bee stings which is kind of counter intuitive because *Apis* is from bee sting but often *Ledum* is the one that acts a little bit better.

Kate: Right. Yes, I have found that to be true as well. Yes, definitely you consider *Ledum* if you got any sort of bite and inflammation from the bite.

Paola: Okay, so it feels like you've been doing homeopathy for a long time, even maybe before you learned about joettecalabrese.com. So, tell us how long you've been doing homeopathy.

Kate: I have been studying homeopathy for about six to seven years now. At first, when I learned about homeopathy, I learned about classical homeopathy which is where you would take and use one remedy at a time. You look at everything about a person's psychological, emotional, physical. I remember being frustrated in the beginning because it takes so much time to figure out the right remedy because you have to look at every symptom and there are thousands of remedies to choose from. So, when my kids would have a cough, it would take me about 45 minutes to try and figure out what to give them for the cough.

Paola: Wow!

Kate: So, Joette has rocked my world. She has changed our lives. This morning, when I was thinking about our interview, I was even emotional because I was so thankful

for how she has changed our lives with what she teaches. When I met Joette, I found her on the internet and then I actually had a consult with her for one of my children. Then I've been taking her courses. I think I've taken almost all of her courses. So about four years now, I've followed Joette and our lives have changed drastically. It's so much easier to use homeopathy now. So, I just really encourage people to take a look at what she has to offer and the Banerji protocols.

Paola: I just think that is just so inspirational. That's why we're doing this podcast series, Moms with Moxie, because we think that it's just Joette that has all this success. But it's true that if you dedicate yourself, you can really learn. I mean, do you agree? I do not live in abject fear of illness?

Kate: Yes. That's why I say she's rocked my world because I used to be afraid. My daughter had pneumonia one time. She ended up in the hospital. That was actually when I was just starting to learn about homeopathy. It was the classical homeopathy. I tried different things. This is a funny story. So, I tried a couple of different things. She was so bad that she was passed out on the couch, you couldn't have any light on, don't talk around me, extremely high fever, couldn't keep anything down. So I was thinking, I can do this, right? I can do this. I can find my homeopathic remedy. I don't want to put her on antibiotics.

Paola: Those were pretty loud symptoms. So you think that helps pick a remedy, right?

Kate: Right. So, I went through a couple of different remedies. After so many hours, as a mom, you get worn out. You just think, "Oh, my gosh! Am I doing this right? I want to care for my daughter." So, I finally tried a remedy. I don't even remember what it was. I'd have to look. I keep a notebook with everything that I gave my kids throughout the

years so I can remember what works for them. But anyway, I just decided I've had it. She's sick and I'm tired and I want to do the right things. We took her to the emergency room. By the time that we got there, the remedy worked.

Paola: No!

Kate: So we were in there and she's sitting up in the wheelchair. She's telling them all the registration information. I'm like, "Are you kidding me?"

Paola: No! So what did you do?

Kate: I was just tired. They did treat her. They gave her an inhaler and some other things just to clear her lungs. But at the time, I was just exhausted and I just needed help. But she really was on the mend by the time that we got there. Using the protocols that Joette teaches, it's so much easier.

Paola: It helps kind of preserve your strength. You were right. We're just talking about just for this interview how I had a sick farm animal, whatever, cows and I'm telling you, it wore me out to try and figure out the remedies with the protocols. I can't imagine. I mean, he would have had antibiotics if I hadn't even been able to narrow it down to a couple of protocols to pick from.

Kate: Exactly. It is so amazing. I'm a big fan of Joette and the Banerji protocols.

Paola: Yes, yes. You mentioned to me about your daughter. She had a couple of conditions that you felt like homeopathy had made it so they were gone permanently.

How homeopathy cured her daughter from her illnesses

Kate: Yes. One of the first things that I did with Joette is we addressed my daughter's eczema. We treated her. She had eczema when she was little which led me into the whole

natural health world. First, I've tried using nutrition which is great. Nutrition is great. I found out she was allergic to a couple of things at the age of two. We stopped giving her those things and she got better. Then, it popped up again. I used herbs. I used essential oils. Then I feel like all those things are great but when you find homeopathy, wow! You're just so excited because it works like nothing else does. Joette helped me and we treated her with *Antimonium crud* 200 combined with *Arsenicum album* 200, twice daily. I also gave her *Calc carb* 200, every other day. That did it. That got rid of her eczema permanently. Whereas before, it would go away and then it would come back and go away and come back. She hasn't had it in, I think four years now.

Paola: Oh, that's beautiful. I love it. Oh, and Joette does talk about that protocol quite a bit. I think she talks about it in Good Gut, Bad Gut. Obviously, she talks about it in Skin. And on her blog, it's there.

Kate: Yes. It's a fantastic protocol. My daughter also had asthma. We've been working with that over the years. We used *Kali carb* 200, twice daily for a while. It got rid of the asthma. But then, it came back. Now we've been using in the last, I'd say four months, we've been using *Lachesis* 200, every other day. In the four months or so that we've been using it, she hasn't had severe asthma attacks. That's been amazing. When she gets an asthma attack, it's very short and very little. So I'm really confident that that's going to take care of her asthma. The other thing is that when she does have an attack, she uses *Kali iodatum*. That helps her with the attack and she doesn't need to use an inhaler.

Paola: So she is that in the acute. That's the magic markers Joette talks about where you look for an improvement, and frequency, intensity. There's a whole podcast where she talks about how to look for improvement. So as she continues to improve, you can expect to wean her

off of these remedies.

Kate: Exactly. I think sometimes people get frustrated and think if it's a chronic condition that, "Oh, it's not working." But they don't look at the overall picture of like you're saying, Paola, how often they have the issues and how intense they are. I think it's good to really write those markers down, the symptoms, and really take a look month to month to see if it is changing because you have chronic conditions that have taken years to come about in your body. It's not just over night that they disappear. So we need to have patience and stick with things for a while.

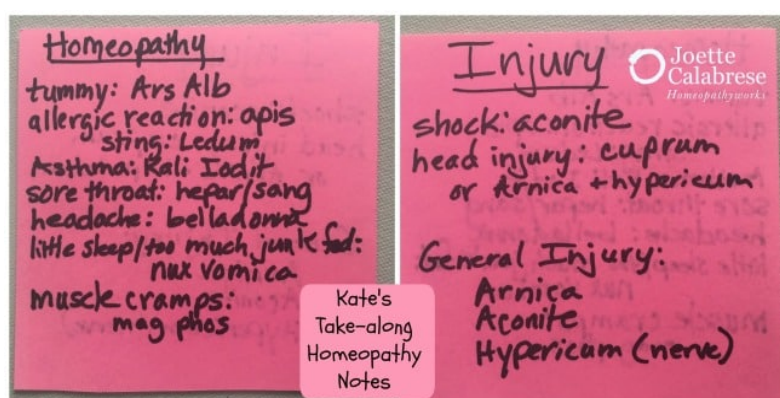

Paola: Yes, patience is the big one. You definitely learn patience with homeopathy which is a good thing. I think it's impatience that leads us to the drugs and the antibiotics because it's so easy. It seems so easy and tempting.

Kate: But then if you think about it and I know that you know this but you take antibiotics, say for whatever condition. What you're doing is you're just masking the symptoms. You might feel better but it's going to drive that condition into maybe something else in your body. It's going to come out in another way. So, you're not really healing your body. You're just getting over it for that time. Then it comes back again like asthma or a chronic cough, whatever it is, eczema like what happened with my daughter. So we really want to try to do something that's going to empower our bodies to heal for good.

Paola: Right. Okay. Another thing Kate that I was impressed with in your little family of homeopathy is that it sounds like your daughter who's 15, right? She's getting pretty good at homeopathy. I love to hear that because I want to pass this on to my children and my grandchildren. Tell me about that, how it's been teaching your daughter and how do you do it.

Kate: Well, I think the biggest way is just she sees me use it. She sees the success with it and then she builds up the confidence to use it as well. For myself and for my children, it's repetition to really just doing it, seeing me help other people with it. Then that even gives them more confidence. One of the things that I do is I send them, wherever they go, if they go and stay at a friend's house or on a trip or something, I give them a bag of homeopathy, a ziplock bag.

Paola: I love it.

Kate: I put a card in the bag. It tells them. So for a tummy ache, take this. For a headache, take this. For a fever, take this. For accident, take this. A cheat sheet so that they can know what to do because when I'm sick, I can't think clearly.

Paola: I love that. I teach a little study group class on homeopathics in Joette's Curriculum, the Study Group Curriculum. I help people all the time. But sometimes when I'm sick, they'll call or a friend will hear and come over or something and I'll be sick. They'll say, "Well, don't you need to just take like *Ignatia* because you're so stressed about your farm animal?" I'm the worst patient of myself. I can use it. So, it would be so nice. Because my husband, all he knows is *Aconite* and *Hepar sulph* so he's of no help. I can't wait until my kids could step up and help.

Kate: Exactly. Also, my daughter is going to be taking some of Joette's courses and so that's exciting, too because I feel like she will learn more about the remedies and how to use them. She's very good at using them right now. She's pretty good. I would definitely ask her if I had an issue.

Paola: That's awesome. I love that. It's so generational. This is so generational. I love that. You're going to share with us a copy of that little cheat sheet you give your kids. We will put it on Joette's blog under this podcast so you can visit the podcast and you can see a copy of that.

Kate: Yes.

Paola: Okay. Cool. Moving forward, I know we have a big culminating story. You want to share about an unfortunate accident you experienced. But before we get there, are there any experiences you wanted to share with us with homeopathy?

Sharing some amazing homeopathic experiences

Kate: Sure, yes. There are so many stories. Oh, my goodness! That's my favorite thing to talk about. One thing that I remember that happened last summer, my son went biking. He went with a friend of his. They just took off down these trails. There were a lot of hills. He had never ridden his friend's bike. He jumped on his friend's bike and they went over a big hill. His friend's bike was different. It didn't have the same braking system that he was used to. He was airborne. He landed and his bike hit first. His head hit the handle bar of the bike and then he flipped over backwards and landed on his back. They were way deep in the woods. I was waiting for them to come back. I didn't know where they were or how to find them. So he came back, pushing his bike really kind of dazed.

The first thing I did, of course, was run and get the *Arnica* and I gave him *Arnica*. I thought that I had *Aconite* with me but I did not. Now, *Aconite* is a great remedy for shock. We

were about 10 minutes away from town. The *Arnica* helped him but he was not talkative. He was very quiet. I knew that he was shocky. So I just put him in the van and I drove to town. I drove to our local health food store. I bought some *Aconite* 30 because they only have the 30 potencies. Otherwise, I would have used 200. I gave him some *Aconite* 30. Within five to ten minutes after giving him that, he was talkative and joking around and acting normal. I was like, "Should I take him to the emergency room or give him *Aconite*?" It was a serious accident. So, I just stayed in town a little while just to make sure that all these symptoms were going away. The *Aconite* did it for him. I just continued the *Arnica* 200 and *Aconite*, just alternating them for a little while. Then we ended up continuing with the *Arnica* 200 because he had huge bruises on his face and his eye. But yes, he was good. So, thank the Lord for *Aconite* and *Arnica*.

Paola: I can just picture him joking about how cool the accident was. That's what those boys do at that age, right?

Kate: Exactly.

Paola: Right.

Kate: And also, he loves to snowboard. So, I send him all the time when he goes down the hill, I give him *Arnica* that he keeps in his pocket. The funny thing is that if he falls and hurts himself, he'll just take some *Arnica*, wait a few minutes, and then he's back up and going because the *Arnica* works so fast that they feel great afterwards. Then he's back up and going. I guess that's good at that, right?

Paola: Right, exactly. And maybe, maybe he should take it easy.

Kate: Yes, I know. His friend was with us one time and he vomited. I didn't see it but he must have hit his head because he was sitting up. When I got to him, he's kind of

dazed. This is a really good thing to know that I learned from Joette and the Banerji's is *Cuprum metallicum* is great for head injuries. So I tried *Arnica* with him once and didn't seem to do much. I gave him the *Cuprum* and right away, within five minutes, he was feeling fine. He said, "I want to get up and go snowboarding again." I was saying to him, "No, you need to rest. You fell hard." He was saying that his head was hurting like an 8 out of 10. So it was pretty bad and so I made him rest for a while. But the *Cuprum* is really amazing. That's a great one to know about for head injuries.

Paola: Right. Very good, very, very good, especially moms with teenage boys. I have a friend here in Texas who has three teenage boys. When I had an accident myself where I cut my hand, I knew I could call her right away because she uses a lot of homeopathy because she's got three teenage boys. I know she's dealt with injuries before.

Kate: Yes.

Paola: So that's great.

Kate: Okay, do we have time for one more story?

Paola: Yes, go ahead. Let's hear another one.

Kate: A tick disease is something I'm passionate about because the *Ledum* has helped me just so wonderfully with fighting tick disease.

Paola: So real quick, in Wisconsin there's a lot of ticks and they carry Lyme disease and other diseases, right? Not just Lyme.

Kate: Yes. There are a number of tick diseases that you can have, some of them worse than others. But a lot of people suffer from that on the East Coast and in this area. They don't realize that it gets misdiagnosed a lot as chronic

inflammatory conditions like fibromyalgia or other things. I was not feeling well for a long time and finally went and was tested for tick disease. I found out that I had three different tick diseases. I chose to use *Ledum* instead of anything else. It worked amazing. Within, I don't know, four or five hours, I was up doing things and feeling so much better. So I've used that for many months, almost a year probably. I feel so much better. I've seen it work amazingly. Our dog came down with tick disease. I woke up one morning and she wasn't eating. She was lethargic, just laying around and limping when she got up.

Paola: How would you know that was tick disease? I would think maybe they ate something weird.

Kate: Because I've seen it so many times. We've had several pets that have had tick disease in horses, dogs, humans. I recognize it.

Paola: Okay.

Kate: Anyway, I gave her a dose of *Ledum*. I called the vet and I scheduled an appointment for the afternoon. By the time we got to the vet, she was totally fine.

Paola: Wow!

Kate: How amazing it works. When I got there, he said, "She seems fine." I said, "No. She has a tick disease. Can you test her, please?" It turns out she had three tick diseases.

Paola: Wow!

Kate: Yes, exactly. But she was really fine after that first dose of *Ledum*. I think I just kept giving her *Ledum*. But I wanted to be sure. Actually before I knew about all this, we had a dog that passed away from a tick disease. It was pretty traumatic. I've seen it work with horses the same way. We had a friend's horse that was not moving very well,

would not run to her, would not turn, not very hungry. I said, "Give her a dose of the *Ledum*. It sounds like tick disease." She did. She gave her the dose in the morning. She came home from work in the afternoon and her horse came running after her just fine.

Paola: Wow!

Kate: That is how amazing it is with tick diseases. Of course, if people have had tick diseases for a long period of time, it can be more difficult to see the results. But it's an amazing remedy.

Paola: Maybe it's not even as often as simple as taking like *Ledum* or something once it's been with you for a long time.

Kate: Exactly. It can be more complex. But yes, I've seen it work like this many more times and even when I just said so.

Paola: Do you have any recommendations? I know a lot of people will get a tick disease and they don't even know they were ever bit by a tick. Do you know what I mean?

Kate: Right.

Paola: So you're just kind of being aware of your body and how you're feeling.

Kate: Yes, rashes on your body because a rash that you see, a rash that is, you don't know where it came from, that can be a tick bite that developed into a tick disease. Yes, if you're feeling lethargic, if you feel like you can't think, tired all the time, those are some of the symptoms that I dealt with personally.

Paola: Right.

Kate: Yes.

Paola: Well, very good. Yes, I know that this is definitely a big issue with a lot of people. I've actually heard about some famous people that had tick diseases like I think Avril Lavigne did and Tommy Hilfiger's daughter did. I think that awareness is growing and it's important so people know what's going on.

Kate: Right. I would encourage people to look at Joette's blog because she has a really good blog about tick disease and what to do for tick bites. Check that out because that has all the information on it.

Paola: It's like a protocol she developed. She says she has yet to see it fail once you get the tick bite.

Kate: Yes, exactly. If you get a bite, definitely take some *Ledum*. Even if you don't have a tick disease, take some *Ledum*. I give my horses and our dog *Ledum* about once a month just to prevent. I know we don't encourage homeopathy as a preventative but you don't know when an animal gets bit by a tick necessarily because they're outside. You can't see the bite marks.

Paola: So you kind of do it prophylactically, so to speak.

Kate: I do. Yes.

Paola: But it seems well-justified because you're in an area where it's pretty heavy with ticks. You're in the country, I assume, right?

Kate: Yes.

Paola: Yes, exactly. Okay. So Kate, I want to hear the big story. You just showed me your arm. There are stitches going the entire length of your forearm on two different sides. You had a terrible accident. The story is amazing so just go ahead and take it away and tell us what happened. I'm so sorry you got hurt.

Kate's accident and how *Arnica* and *Hypericum* helped a lot

Kate: Yes, it wasn't fun having it happen but so many good things have come out of it. So, I'm still thankful. I'm thankful to be alive really. Here's the story. I was at a horse show and we had a new young horse. I took her into a trail class and I rode her through. She was nervous about everything in the class. She doesn't have a lot of show experience. At the end of the trail class, I got off of her and I thought, "Whew! We made it and I'm alive."

Paola: Right.

Kate: Then I proceeded to walk her over a log so I had the rein in my hand and she flew. She ran me over and I ended up underneath her, holding on to her rein. She was kind of walking on top of me, like over the top of me. So she ended up stepping on my arm. I don't remember it happening. I just remember being on the ground and thinking, "Curl up in a ball so she doesn't step on you." Then I got up and I remember my arm. This is kind of gross. I don't know if it's okay to say but my arm was hanging from skin and muscle.

Paola: Ugh!

Kate: So I said, "Serena, go get my homeopathy kit."

Paola: That's your daughter?

Kate: Yes, my daughter.

Paola: Your budding homeopath.

Kate: Yes. They were saying, "Somebody call an ambulance." I said, "No. Don't call an ambulance. Serena, go get my hom-." And I was very emphatic about the homeopathy. I could see her. She was kind of standing there. She, of course, went to get it.

Paola: I can see everybody standing, "Don't get an

ambulance. What the heck is a homeopathy kit?"

Kate: Yes, you're right. I wonder what they were thinking. And so, she got it. I didn't realize this but I had an open

end fracture. My brother was there, thankfully. He came up and he held my arm so that the bleeding would stop. Serena kept dosing me with the strongest *Arnica* and *Hypericum* that I have along with me which was *Arnica* 1M and *Hypericum* 1M.

Looking back, I wished that I would have had the 10Ms with me and I would have done that. So now, guess what I ordered? *Arnica* 10M and *Hypericum* 10M and I will not go anywhere without them. You can be sure of that. Anyway, they got me in the car, took me to the local hospital which was a very

small hospital. I was in the ER. I just had Serena keep dosing me with *Arnica* and *Hypericum* every, I don't know, 10 to 30 minutes at first. So it was every few minutes. Then it gradually got further and further apart. In the first ER, I was there for probably four hours or so. Serena just kept giving me that. They kept asking me, "Do you need pain meds?" I said, "No, I don't need any pain medication. I'm fine." I was in pain obviously.

Paola: Right.

Kate: But I wasn't in enough pain that I felt like it wasn't controlled.

Paola: Right.

Kate: So *Arnica* and *Hypericum* were amazing. They made it bearable. I did not have *Aconite* with me. I wish I would have because I would have taken that as well for shock.

Paola: Right.

Kate: They kept saying to me, "You're going to go into shock. We need to get you to the hospital." I said, "No, I'm fine." The *Arnica* and *Hypericum* really took care of that, too which was amazing. Anyway, they ended up having to transport me for surgery about an hour and a half away. So I had a bumpy car ride with my arm in a makeshift brace. Then I had another about five hours until I had surgery.

Paola: Because they had a hard time finding a surgeon who is qualified enough to deal with your injury.

Kate: 4th of July weekend and they called several hospitals who wouldn't take me and they gave different reasons. But I think they just didn't want to come in on the holiday weekend.

Paola: Yes. I mean, if you're listening to this podcast,

you really need to see this photographs of her arm. I mean, you do not appreciate the magnitude of this injury until you see. I mean, it's like Frankenstein arm all the way down with the stitches.

Kate: Yes, it was crazy. Thankfully, we found a surgeon that would take me and do surgery. In the surgery, I had five fractures on my arm. He had to cut through two muscles to put two plates into my arm. I also had bruised ribs.

I never had an x-ray of my ribs so I'm still not sure whether they're broken or are they bruised. I don't know. But they were extremely painful. I had my cheekbone that was also bruised because it was very sore. I didn't really know those things as much when I was in the hospital because the *Arnica* and *Hypericum* really took away the pain on those things. My ribs hurt but not extreme. But by the time I got home, I realized those were very injured as well.

Long story short, I had surgery and I had a nerve block in my arm for the surgery. After the nerve block, I was in the hospital for another about 12 hours. They kept telling me to take pain medicine. They almost did not let me leave the hospital without taking pain meds. So finally, I agreed to take some Tylenol just because they were so adamant. They said, "You are going to need pain meds and we want to see how you respond." They actually wanted me to take oxycodone. They wanted to see how I responded to it while I was still in the hospital.

Paola: Like if you're allergic or something.

Kate: Right, right. I just said, "No, I don't need that. I'm going to be fine." They wouldn't believe me. I asked them about homeopathy. They just said they'd have to check with the doctor. I said, "Okay, I won't use it then." (Wink, wink).

Paola: Right. "This is off the tape. I was just kidding."

Kate: Yes.

Paola: So your daughter had been dosing you kind of privately, secretly without them seeing.

Kate: Yes, yes. In the first hospital, they were actually good about it. It was openly that they let her do it because one of the attendants, his wife was studying to be a naturopath and so he knew about it.

Paola: Oh.

Kate: They know it.

Paola: Yes.

Kate: The attending physician there, she didn't know that I was doing it but the people who were actually with me, they knew and they didn't care. So that was great. In the

second hospital, not so much so. But that's okay. Finally, I took a Tylenol so that they would let me go home. I'm like, "Oh, I feel so much better now."

Paola: "Thank you. So glad you guys have Tylenol."

Kate: I'm going to be fine with the Tylenol.

Paola: That's fun.

Kate: Anyway, I went home and I just used homeopathy. Then I did have a consult with Joette and she put me on a protocol. I'm actually taking a lot of different remedies. I never really realized you could take so many remedies at a time. But I guess in an emergency acute situation and a traumatic thing that I went through, you can do those things for a short time. So I have a huge list of remedies that I'm taking right now. But I'm gradually able to come off of some of them as things change in my body and heal.

Paola: Did you take [The Survivalist Guide](#)?

Kate: I did. Okay, that is something that everyone needs to know about. I love the Survivalist Guide Book. That is a book that I cannot live without. That book has so many great things in it. I think everyone listening needs to take that course because it's a life saver. It literally is in so many ways. It has every emergency situation that you can think of and how to handle it homeopathically.

Paola: Yes. Not all of Joette's courses come with a binder or book but this is one of them that does. And so, I'm sure a lot of the remedies she put you on for your injury are also discussed in that course. They're listed in the book.

Kate: Right. I will tell you on my follow up visits with my surgeon, I had one a couple of weeks ago and he said that the swelling in my hand and in my arm is greatly less than he would have expected it to be considering what I went

through and the surgery and everything. I know that's due to homeopathy for sure. That *Lycopodium* 30 is great for edema and that's what Joette put me on for that. But then again, the *Arnica* is also great for that and I was taking that for quite a while as well.

Paola: Interesting. We use *Lycopodium* 30 on my little cow out here because he had pretty bad edema. That was just one that Joette told me to do. I was like, "I didn't know about *Lycopodium*. Okay." And I just did it. But now I'm piecing it together right now. That's why she picked it.

Kate: Yes. I didn't know about that either so that's definitely one thing that I'm going to remember.

Paola: It breaks my heart that we don't have homeopathy in the hospitals like we should because I mean, for heaven's sakes, just in the emergency room. Please just put it in the emergency room.

Kate: Right.

Paola: Such a big help.

Kate: Can you imagine having a horse step on your arm, what kind of bruising should I have had on my arm and my hand? Then having the trauma of having stitches on both sides of my arm all the way up my forearm? Okay, I had no bruising. I mean, there was no bruising.

Paola: We can see the photos you're sending us. We're going to put the photos on this blog. But I mean it's hard to believe, Kate.

Kate: Yes, it is. It's really hard to believe. I had some swelling. But yes, it was really amazing. You have to look at the pictures then you'll be able to see the full scope of what homeopathy actually did and how it helped.

Paola: Kate, you're awesome. I loved hearing the story. I'm so glad you're feeling better. I love homeopathy.

Kate: Me too.

Paola: Joette is awesome. We love Joette.

Kate: Hey, Joette.

Paola: I know. So thank you so much for joining us and for being a Mom with Moxie and being willing to share your story and for helping out our listeners learn. Are you working in your community? Do you have study groups or anything like that or have you thought about starting one because you're

rocking it. You've got lots of information.

Kate: Yes, I actually want to start a study group since then and I'm excited to do it. But we do help a lot of people with homeopathy and talk a lot about it. So there are a lot of people that have learned about it. It's just fun to share and see people's lives change with it.

Paola: Yes. Awesome. Well, thank you so much, Kate. Thank you again.

Joette: Are you or someone you know a Mom with Moxie? Well, we're on the hunt for you. Of course, we don't want to hear just from moms but from anyone who uses and loves homeopathy. Reach out to my podcast team and let us know why you're a Mom with Moxie. For more information, contact podcast@joettecalabrese.com.

Thank you for listening to this podcast with Joette Calabrese. If you liked it, please share it with your friends. To learn more and find out if homeopathy is a good fit in your health strategy, visit joettecalabrese.com and schedule a free 15-minute conversation.

P.S. If this is a subject that turns you on as much as it does me and you want to "get it" too, join me in my [Survivalist Guide to Homeopathy](#) to better understand how to endure both natural and man-made disasters. But don't think that this guide is mandatory. Simply stay tuned to this blog because my plan is to give you years' worth of free content right here every week.

Either way, I wholeheartedly believe homeopathy to be the ultimate medicine for everyone who wants to be, or already considers themselves, a survivalist.
