

Francis Gianna, Boynton Beach, Florida

I come from a family with a lot of doctors, and so I have conventional medical care readily available. I love and respect every niece, nephew and in-law with a medical degree, but not one of them, as well intended as they have been, has helped me. Nor have their colleagues. Actually, the meds they've offered only made me worse.

This is why, and the only reason why, decades ago I stopped asking for their help and turned to a more intelligent and curative method: Homeopathy.

I'm in my 80's now and have suffered with chronic osteoarthritis. Sometimes it was milder; other times it kept me on the couch for days. But in the last years since I've been working with Joette, I've had very few flare-ups, and when they do come as meek as they are now, I take the remedy and I'm well in hours.

As the years pass, I'd label it only a little discomfort if I've over-gardened or walked too long.

I was told previously that arthritis only gets worse as you age, but I've found the exact opposite to be true. I think the reason they say this, is because they can't help arthritis like homeopathy can, so all they've witnessed is suffering.

Not for me!!

I don't know what I would've done without my Rhus tox, Tuberculinum and my Joette for having shown me the way into my golden years.

I've told friends about Joette and they've all had remarkable results too!

It makes me jump for joy with wellness and pride...and now, I can actually do it!
