Homeopathy has changed my life!" As a 30-year-old that was diagnosed with MS when I was 21, I struggled for 8 years with modern medicine.

Honestly, I was sicker when I was on the medicines that were prescribed. The constant needles and medications put me in bed for days. I was just fed up and knew it was time for me to take control of this beast.

I found homeopathic medicine and began working with Joette for only 6 months and since then have never felt better.

After taking only two remedies, my body responded in such a wonderful way. It's been over a year now and I don't even need to see Joette much anymore. I again have a clear mind and most importantly, I have charge of my life. Thank You, Joette. I feel so good, often I forget I was told I had such a serious and chronic disease!
