

Madalynn, Amherst, NY

For about five consecutive months, I was getting a yeast infection along with each period I had. It was so uncomfortable I couldn't go to class or even leave my bed for five days out of each month. No medications or home remedies for yeast infections were working.

I finally consulted Joette.. I skeptically took a homeopathic remedy on the last days of a painful period. I am happy to say that the next period I had was the first to be yeast infection free and I haven't had another since...Nor has there been ANY PAIN !
