Success!

For seven years I have been on and off of Sepia for hormonal issues and zero libido. It helped in some areas like when I felt like running away from my family, but it didn't do anything for my cycles or libido. In reviewing my Feminopathy course I found a menopause remedy, *Ammonium carbonicum*. I'm 48 and feel like I'm nearing menopause so I started taking it twice a day. I did that for a week or two and then read in the Banerji book that it's once every 10 days. So now I'm doing that. My cycles are very gentle and my libido is coming back! I'm floored! It's been so long. I am one happy lady!
