I've seen many people benefit from working with Joette Calabrese, including me and many of my patients.

When my beloved aunt was in her mid 80's, and her lifelong robust health began to slip, I called Joette. She reminded me of what she had taught us in class years before. And upon using the homeopathic techniques, my aunt's vitality returned within a few days or so.

A few years later, my aunt became nervous and fretful (most atypical of her). I realized that her mind was slipping and she couldn't grasp what was going on around her.

Another discussion with Joette and another miracle. This time I gave her Baryta carb. Within a short time of taking it, my aunt was her normal, poised self. Her mind was fine. Even though her body did eventually wear out, she remained alert and oriented.
