

Tammy – Cheektowaga, NY

Several years ago (about 6), I took your advise of using garlic olive oil for my ear infections and it worked wonders.

At the time, I was getting monthly ear infections which were excruciatingly painful. We later discovered that they were the result of an antibiotic I took for mastitis.

I bought a bottle of garlic olive oil in a small tincture size bottle with a dropper from Feel Rite when you gave me the suggestion. I still use the same bottle (which I store in my fridge) whenever anyone in the family complains of ear pain. Usually one dose takes care of it! Thanks Joette!
