I'm so appreciative of your work. My dad's heart rate was at 120. Mom gave him Arnica yesterday AM but there was no change the first time. But then in the afternoon she gave it again. This time a lower potency and in 3 minutes it went from 120 to 60! And now it's been near 60 since then. I totally believe in homeopathy but WOW! It's so exciting! Yesterday they used a probe into his heart to see what was going on and they said that things are not as bad as they expected. Being that my mom is a nurse, she's particularly thrilled with what homeopathy has done for my dad. Thank you for your continued help and introducing us to homeopathy.
