

Tina – Florida

I've suffered from asthma nearly all of my life. It was an everyday occurrence and I've lived on Albuteral and Advair for many years. I've also had frequent bouts of bronchitis often accompanied by strep throat. This happened 4 times every winter and 2-3 times every summer for decades. It was not a way to live. Well, this is the way it used to be ...until I met Joette and homeopathy just over 2 years ago.

After working with Joette for several months, I got off my daily meds for the asthma and only used the inhaler occasionally.

Joette didn't tell me to do this, there simply wasn't any need. But it didn't stop there.

The following year I was able to reduce the meds to only very occasional use. Meanwhile, I haven't had bronchitis more than once in the last 2 years. I was released by my ENT this summer after several years of using steroid nasal sprays. I had stopped using them for about two months before my appt. He was very happy with my results.

About a month ago, I got strep throat for the first time in a very long time, but instead of taking the usual antibiotic, I took my homeopathic remedy and it was improved the very next day.

No meds needed!

You have no idea how great this is unless you've been as sick as I've been from this in the past. An added benefit is the fact that I feel so good in general. I just told my husband today that Joette has saved my life and for that I'm forever grateful.
