

Tracy, (Buffalo, NY)

Before I started using Homeopathy I had two bouts of “knock me out” mastitis. For each bout I took antibiotics and was bed ridden for a week. The third time I got mastitis I decided to use Homeopathy. When Joette(my homeopath) taught me about a remedy that has a history of making someone feel better in a couple of days, I chuckled, saying to myself “no way.”

Two days later my skeptical self was amazed. I was out of bed and feeling almost normal. It was kind of magical. From that day I have continued to use homeopathy for my family with wonderful results.
