

Vanessa Craig – Santa Fe, New Mexico

I've been battling IC after a bad reaction to antibiotics back in the fall of 2017.

I just wanted to give you a quick update and thank you for everything you do. I still have minimal symptoms but Med 200 and Cantharis 200 with some occasional Ignatia 200 is all I'm on right now, just twice a day. After so many ups and downs over the last 9 months, the last several weeks have been consistently better and better.

I expect maybe another hiccup or two but it doesn't freak me out like it used to. **I've recently purchased your Feminopathy course and I'm just eating it up!**
